AcroTEX eDucation Bundle:  
Index of Examples

D. P. Story

AcroTEX  
eDucation  
Bundle

Directory

- Document Index
- AcroTEX Documentation
- eForm Documentation
- eq2db Documentation

In the table below, the red square, ■, indicates a link to the PDF document (.pdf), if there is one, and the blue square, □, is a link to the source file (.tex).

Index of AcroTeX Examples	
File	Description
■ webeqman	Manual of usage for the <a href="#">AcroTeX eEducation Bundle</a> .
■ eFormman	Documentation of eForm support
■ eq2dbman	Documentation for the eq2db Package
□ webeqtst	Demonstrates the capabilities of the <code>exercise</code> environment. Examples are also given of multiple choice questions within the <code>shortquiz</code> and <code>quiz</code> environments.
□ jquiztst	shows off math fill-in questions for the <code>shortquiz</code> and <code>quiz</code> environments.

AcroTeX  
eEducation Bundle

File	Description
■ jtxttst	features text fill-in questions in the <code>shortquiz</code> and <code>quiz</code> environments. The file also discusses the various parameters of the <code>\RespBoxTxt</code> command.
■ jqzspec	is a tutorial on how to modify the way the math fill-in command <code>\RespBoxMath</code> processes the user input. This file has an extensive example that shows how you can process, for example, a vector answer.
■ quizpts	is a file that shows how to assign points to questions in a <code>quiz</code> environment.

# AcroTEX eEducation Bundle

File	Description
■ <b>exlist</b>	shows how to create an environment in which the exercises of an <b>exercise</b> environment are listed in enumerated form.
■ <b>book01</b>	shows the basic web layout with the <b>book</b> document class.
■ <b>insdljs_ex</b>	This is a test file of the <b>insdljs</b> package.
■ <b>dljslib_ex</b>	This is a test file of the <b>dljslib</b> package.
■ <b>multivar</b>	This is a sample file illustrating multivariate processing.
■ <b>jqzequat</b>	A sample file illustrating how equations can be processed.

# Acro $\text{\TeX}$

eDucation Bundle

File	Description
<ul style="list-style-type: none"> <li>■ execjsstst</li> </ul>	<p>A demo of the <code>execJS</code> and the <code>defineJS</code> environments. Using these two environment, the file demonstrates how to create an animation purely a <math>\text{\LaTeX}</math> source. The demo also uses <code>animation.pdf</code> (source file <code>animation.tex</code>). The full Acrobat (or Acrobat Approval) is required to build the demo file. Cool.</p>
<ul style="list-style-type: none"> <li>■ defineJS</li> </ul>	<p>A file that demos the <code>defineJS</code> environment, an environment to write field level JavaScript.</p>
<ul style="list-style-type: none"> <li>■ bgtest</li> </ul>	<p>This file illustrates how to create a navigational panel, background colors and/or overlay graphics.</p>
<ul style="list-style-type: none"> <li>■ eqforms</li> </ul>	<p>This file illustrates eForm support</p>

# AcroTEX eEducation Bundle

File	Description
■ pc-test	Test file for nested <b>questions</b> environment, and for assigning partial credit for multiple choice questions.
■ prompt_tst	Demonstrates the “progressive style” quiz question.
■ grp-test	Demonstrates the grouping environment for math fill-in questions.
■ eforms_tst	A simple file demonstrating the stand-alone <b>eForms</b> package.
■ set-test	Demo and tutorial on creating math fill-ins in which the responses are a set of answers or a comma delimited list of numbers.
